

SOUTH EASTERN UNIVERSITY OF SRI LANKA

FACULTY OF TECHNOLOGY

ORIENTATION PROGRAMME FOR FRESHER - 2019/2020
(05TH BATCH)

FROM 26.08.2021 TO 06.09.2021

The message of the Dean/ Faculty of Technology

Dear All Students,

I warmly welcome all the students of the fifth batch (2019/2020) to the Faculty of Technology (FOT) of the South Eastern University of Sri Lanka (SEUSL). I feel proud that you all have selected the FOT, SEUSL to pursue your higher education. Again, I feel proud that you all have selected the FOT, which was firstly established and operated its functions amongst other faculties of technology in the state university system. The FOT is the leading faculty amongst the other faculties of SEUSL with many achievements and progressions within a span of very short time that is five years in its existence. It runs with two special degree programs namely Bachelor of Biosystems Technology (BBST) and Bachelor of Information & Communication Technology (BICT). The only FOT amongst the other faculties of technology in the country to runs its own postgraduate degree program in the technology stream.

Though the FOT started its operation in 2016 at a location outside of the main university, it is now located within the main university premises at Oluvil, the coastal belt of Ampara district in the Eastern Province of Sri Lanka, with the very brand-new three-story building at an amazing environment filled with fresh air and other natural scenic beauties. The building consists of all the necessary facilities including many laboratories with ultra-modern and multi-million worth equipment, instruments and other related gadgets and facilities. Moreover, the SEUSL provides equal opportunity for every student devoid of cast, creed, color, race and religion in sharing the resources including the library, canteen, accommodation, physical education, health and medical, students support services, and the entertainment etc. The SEUSL is the one and only university in the state university system which provide accommodation facilities for all four years continuously. As per the higher educational policy of the government to provide higher education opportunity for more students and thereby to increase the intake of students, the FOT also has increased its intake of Biosystems Technology students from 100 to 110 and Information & Communication Technology from 75 to 100 for the fifth batch.

All the teaching-learning activities of FOT are mediated through the FOT Learning Management System (LMS). Every student can access the teaching-learning related materials such as course information sheets, lecture notes, recorded lectures (audio/video), reading materials and past question papers of each course units through the LMS. Further, most of the administration process are performed through automated system which facilitates the student registration, applying and sitting for examination etc. Wireless internet access is available for students on their registered devices throughout the faculty.

I wish you all for a committed education and a bright and joyful life experience at the FOT and SEUSL.

Dr. U. L. Abdul Majeed
Dean
Faculty of Technology
South Eastern University of Sri Lanka
